INTRODUCTION

Families are classified in this report according to the marital status, sex and age of the family head, showing type, size, and composition of family, as well as the average wage and salary earnings of (a) the family head, and (b) the family,

- (i) provinces (Table 73), and
- (ii) census metropolitan areas (including the cities of Regina and Saskatoon) (Table 74).

Comparative figures on the number of families by marital status, sex and age of the family head, for 1951 and 1956, are shown in Table 72.

Definitions

Family:

A census family consists of a husband and wife (with or without children who have never married) or a parent with one or more children never married, living together in the same dwelling. Adopted children and stepchildren are counted as own children, and, in fact, a family, for census purposes, may comprise a man or woman living with a guardianship child or ward under 21 years of age. It should be noted that the term "children" refers to children in families who have never married, who are under 25 years of age living at home at the census date.

Type of family:

Families are classified as to whether they maintain their own household, that is whether the head of the family is also the head of the household. Those not maintaining their own household are classified as to whether the family is related to the household head or represents a lodging family. A relatively small number of families, such as those of servants or employees, are included in the total families shown as not maintaining their own household.

Labour force:

The 1961 labour force includes all persons, 15 years of age and over, who, during the week prior to enumeration, were reported as having a job of any kind, either part-time or fulltime (even if they were not at work), or were reported as looking for work. In urban localities the major portion of the enumeration extended over the first two weeks in June and in rural areas over the first three weeks. The item "Families with head in labour force", therefore, includes all families in which the family head was in the labour force, as defined above, except a few in which the family head was reported as seeking his or her first job during the week prior to enumera-

Wage-earner family:

A wage-earner family is one in which the family head was a wage or salary earner during the census week, i.e., the week prior to enumeration.

By "earnings of head" is meant the gross wage and salary income received by the family head as cash wages and salary from all employers during the 12 months prior to June 1961, including money received as commission, tips, piece-rate payments, etc. "Family earnings" represent all wage and salary income reported by family members of wage-earner families, including the head's earnings. "Average earnings" are obtained by dividing the aggregate earnings for wageearner heads, or for all wage-earner family members in the case of family earnings, by the number of wage-earner heads with stated earnings. Families are not considered as having "stated earnings" where the wage-earner head or any wageearner member did not state his or her earnings. Not included in wage and salary earnings, of course, is any income from other sources such as from a business operated by a family member.

INTRODUCTION

Le présent rapport classe les familles selon l'état matrimonial, le sexe et l'âge du chef de famille, et indique le genre, la taille et la composition des familles, ainsi que la rémunération moyenne a) du chef de famille, et b) de la famille, par:

- i) province (tableau 73), et
- ii) zone métropolitaine de recensement (y compris les villes de Regina et de Saskatoon) (tableau 74).

Les chiffres correspondants de 1951 et de 1956, relativement au nombre de familles selon l'état matrimonial, le sexe et l'âge du chef de famille, figurent au tableau 72.

Définitions

Famille:

Pour les fins du recensement, la famille se compose d'un époux et de son épouse (avec ou sans enfants non encore mariés) ou de l'un des deux avec un ou plusieurs enfants non encore mariés, et demeurant ensemble dans le même logement. Les enfants adoptifs et les beaux-fils et belles-filles comptent comme propres enfants, et, de fait, aux termes du recensement, une famille peut se composer d'un homme ou d'une femme demeurant avec un enfant en tutelle ou pupille de moins de 21 ans. A remarquer que le terme "enfants" désigne les enfants dans les familles non encore mariés, de moins de 25 ans et demeurant à la maison à la date du recensement.

Genre de famille:

Les familles sont classées suivant qu'elles entretiennent ou non leur propre ménage, c'est-à-dire suivant que le chef de famille se trouve aussi le chef du ménage. Les familles qui n'entretiennent pas leur propre ménage sont classées suivant que la famille est apparentée au chef du ménage ou constitue une famille chambreuse. Relativement peu de familles, notamment celles de serviteurs ou d'employés, sont comprises dans le total des familles indiquées comme n'entretenant pas leur propre ménage.

Main-d'oeuvre:

La main-d'oeuvre de 1961 comprend toutes les personnes de 15 ans et plus qui, au cours de la semaine précédant le dé-nombrement, ont été déclarées comme ayant un emploi quelconque, à temps partiel ou de plein temps (même si elles n'ont pas travaillé), ou qui étaient en quête de travail. Dans les villes, la majeure partie du dénombrement s'est effectuée durant les deux premières semaines de juin et, dans les régions rurales durant les trois premières. Par "familles dont le chef fait partie de la main-d'oeuvre", on entend toutes celles dont le chef faisait partie de la main-d'oeuvre, selon la définition donnée ci-dessus, sauf quelques-unes où le chef a été déclaré comme étant en quête de son premier emploi au cours de la semaine précédant le dénombrement.

Famille salariée:

Une famille salariée est celle dont le chef était un employé à salaire ou à traitement au cours de la semaine du recensement. c'est-à-dire au cours de la semaine précédant le dénombrement.

Par "gain du chef", on entend le salaire ou le traitement brut reçu par le chef de famille en salaire ou traitement monétaire provenant de tous ses employeurs durant les 12 mois antérieurs à juin 1961, y compris les sommes reçues en commission, pourboires, paiements pour travail à la pièce, etc. Le "gain de la famille" représente tous les salaires et traitements déclarés par les membres des familles salariées, y compris le gain du chef. On obtient le "gain moyen" en divisant le gain global des chefs salariés, ou de tous les membres de familles salariées dans le cas du gain de famille, par le nombre de chefs salariés déclarant un gain. Une famille n'est pas considérée comme ayant indiqué son gain si le chef salarié ou tout membre salarié n'a pas déclaré son propre gain. Le gain ne comprend pas, bien entendu, tout revenu provenant d'autres sources, par exemple, d'une entreprise exploitée par un membre de la famille.
